Photovoltaic System

Details

Modules: (8,712) ZNShine 700W

Maximum Power: 6.10 MW

Monthly Production : 821.12 MWh

Annual Production : 9.85 GWh

Sized for a consumption of 1,312,040 kWh per month.

Electricity bill

Without Solar Panels

\$176,939 USD

With Solar Panels

\$62,883.17 USD

Production with
Solar Panels VS
Consumption

Anodized Aluminum Structure.....01

Installation of the photovoltaic system

Generation of connection diagrams

Management of interconnection with CFE

System commissioning

USD/Watt: 0.7

Total: **\$4,268,880.00 USD**

Price includes VAT

Installation includes:

- Anodized aluminum structure
- Grounding of the electrical system and aluminium structure
- Electrical system protections according to NOM/NEC
- Inverter/controllers programming
- Basic training for the end user
- Management and certification with UVIE for interconnection with CFE at both meters
- Underground piping through green areas
- General breaker replacement

This quote does not include:

- Excavations through concrete, civil works, metalwork jobs

Financial Analysis

\$1,464,083.66 USD

Annual savings

3 años y 0 meses

**Return on
Investment Period**

\$32,424,704.36 USD

**Total savings on electricity
payment (25 years)**

39%

IRR

Acquired Savings

Cash Flow (USD)

Exercise using:

- Annual inflation rate of 4%
- Annual CFE rate increase of 4.5%
- Contracted maximum demand of 3000 kW. (To be reviewed with CFE bill)
- Constant monthly consumption of 1,312,000 kWh

Years	PV Energy Produced [MW]	Income or Expenses [\$ USD]	Accumulated Savings [\$ USD]
Initial	0.00	-4,268,880.00	-4,268,880.00

Environmental Impact

Your solar panels make a significant benefit to the environment. The following metrics help quantify the equivalent offsets in your ecological footprint:

70,178,575
Gallons of
gasoline
equivalent

6,256,987
Incandescent
lamps replaced
by LEDs

27,113,610
Trees planted
over 10 years

380,054
Barrels of oil
equivalent

Installation done in Atoyac,
Guerrero
